
```
// Initializes the activity of the active object.  
cccc/ not called in case of restart after migration // Called before runActivity() r9.8 7.2002 r
```

```
// or until the body terminates
```

Others:

```
void fifoServing();  
    // Start a FIFO service policy. Call does not return. In case of  
    // a migration, a new runActivity() will be started on the new site  
void    lifoServing()  
    // Invoke a LIFO policy. Call does not return. In case of  
    // a migration, a new runActivity() will be started on the new site  
void    serveYoungest()  
    // Serves the youngest request in the request queue  
void    flushAll()
```
